About Us

Who we are

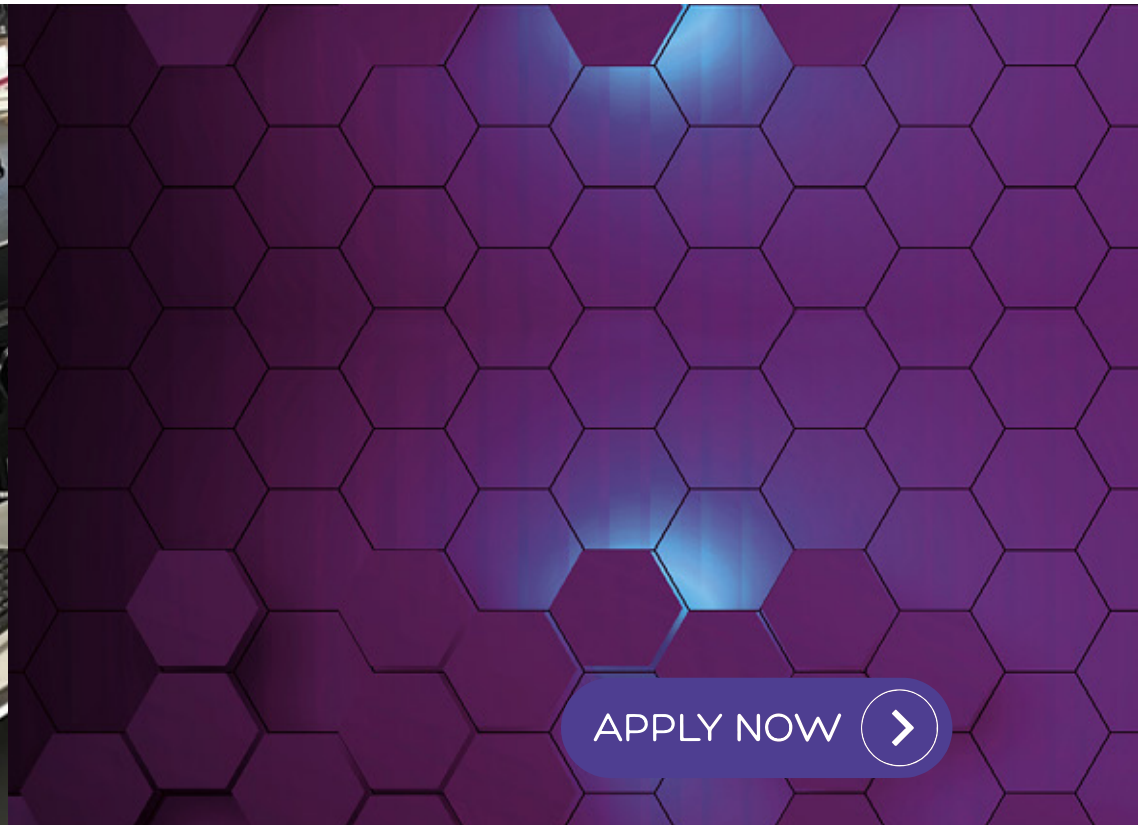

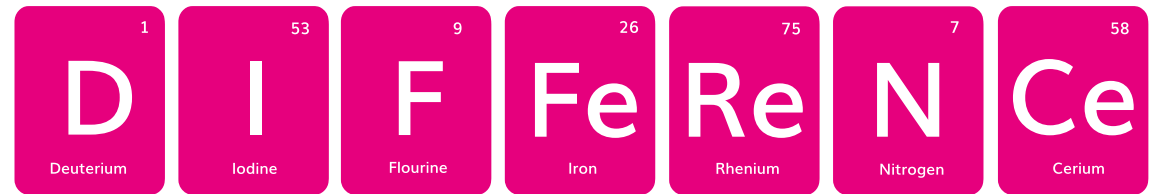

We're Quorum Cyber and our mission is to help good people win by defending teams and organisations across the world and all industry sectors against the rising threat of cyber-attacks, enabling them to thrive in an increasingly hostile, unpredictable, and fast-changing digital landscape.

Founded in Edinburgh in 2016, we are one of the fastest growing cyber security companies in the UK with over 150 customers on four continents. We are proud winners of the Scottish Cyber Awards and Digital Technology Awards for our innovative, in-house built services and in 2022 we were s1jobs Recruitment Awards 2023 Winners for Best Creative Idea.

Our graduate programme

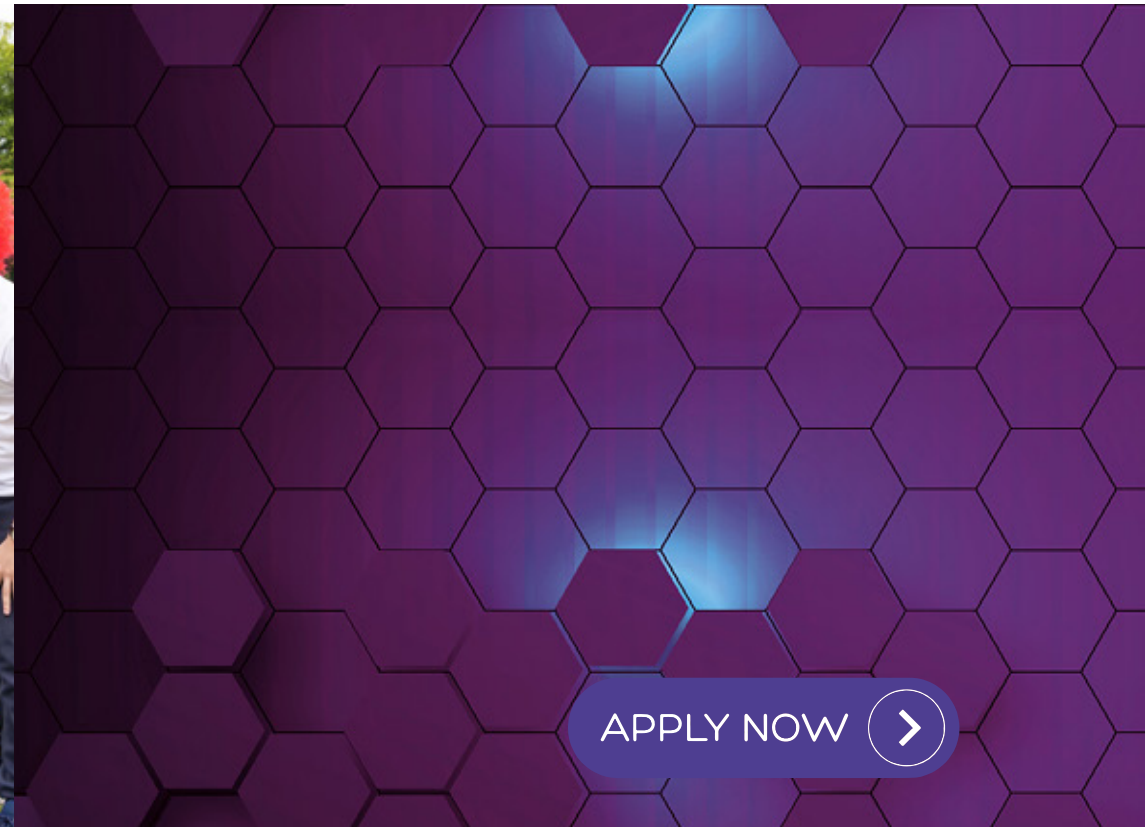

All good stories have a brilliant start – and that’s what we offer you as a graduate here at Quorum Cyber. The chance to give your career story the best possible beginning. From the moment you start here you’ll be learning. And my, what you’ll learn. Beginning with the basics of what every part of Quorum Cyber does, to finding out about the cyber security landscape, and discovering the tools and technologies we use. It’s a steep learning curve, but we know you can do it.

We are a diverse and inclusive organisation who like to get serious with work but find the time for meeting and getting to know other humans. We find that people fit in easily here, and that’s because we share a purpose and an outlook on life.

You bring all the right elements

What to expect from us

You bring all the right elements

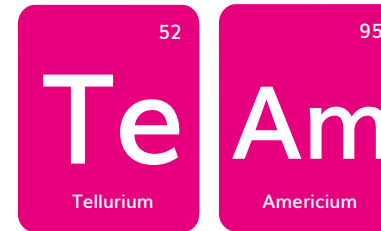

A unique opportunity to gain experience and training across our business, including quality time spent in our Security Operations Centre (SOC), Engineering, Offensive Security, Advisory, and Incident Response (IR) teams on a planned rotational basis and each will be formally mentored by one of our senior staff. By the end of the programme, in addition to the deep experience you will gain, you will also have collected a range of industry recognised accreditations and received valuable in-house and external training through the Quorum Cyber Academy.

And there's more. You will get an excellent salary, with world class benefits and training (private health, unlimited holidays, flexible working). As leading-edge technology company you will have access to the latest technology; in an environment that will encourage and nurture your curiosity. We are passionate about your learning, and you will be empowered to advance your skills and expertise.

What you'll be doing and where

You will rotate around our teams and gain experience and training across the entire spectrum of cyber security

- Gain industry recognised security and technical accreditations
- Gain additional training in “soft skills”
- Be pushed and stretched
- Have a unique and exciting experience

Join our

Where you'll work

As an organisation we are generally happy to accommodate remote working. However, we know that you'll get the most out of our graduate programme by being in the office regularly, so to be considered for these roles you should live close enough to Edinburgh to be here most days, or be prepared to relocate.

APPLY NOW

What we expect from you

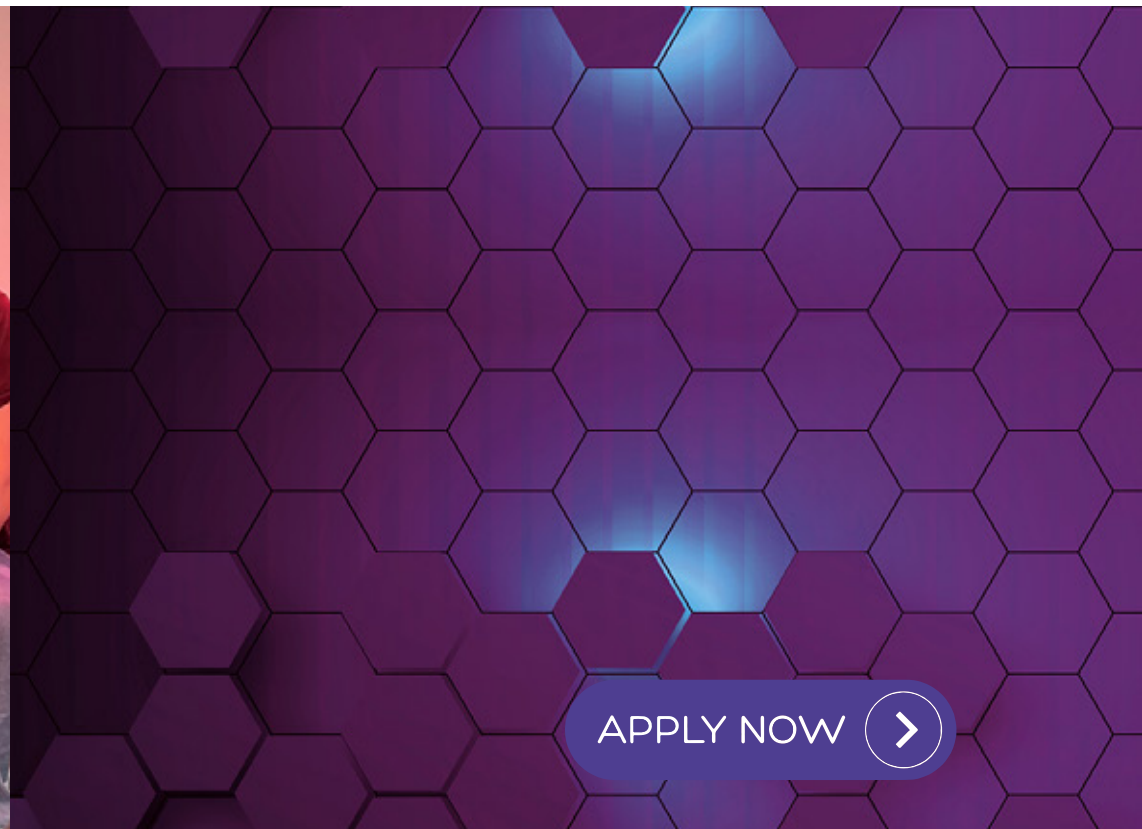

- Relevant cyber security or IT honours degree (minimum 2.1)
- Enthusiasm and hunger to learn
- Technical curiosity
- Ability to think clearly under pressure
- Analytical skills
- Great communication skills
- Curious and innovative
- Great team player

APPLY NOW

Capture the Flag !

Capture the Flag !

And now the fun bit

In keeping with our unique programme, our selection process is also a little unusual, and can be fun as well as challenging. Front and centre is a two-day Capture The Flag (CTF) event, which will be held in the middle of February 2024

What's CTF did I hear you say ? It's a fun, and sometimes frustrating, mix of technical challenges across multiple disciplines. This has been designed to include different areas

of cyber security from pen testing to incident response and SOC as well as data compliance. The event is run and managed by our very own talented Cyber experts so you'll get a chance to meet real Quorum Cyber people.

Don't worry if you have never tackled a CTF before, we have set up the event to be "newbie" friendly.

[APPLY NOW](#)

If this sounds like the opportunity you have been waiting for, get your application in and get ready for the CTF.

Apply now and the successful applicants will be contacted in the last week in January.
